Australian Embassy Morocco

Bradwell Group Client
Fleetwood Australia

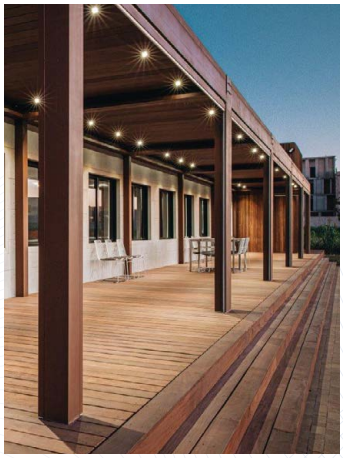
Project Builder
CC Pines/ Australian Government

Trades
Electrical / Mechanical

Value
$500,000 - $ 1,000,000

Completion Date
February 2020

Bradwell Group were awarded to partner with Fleetwood Australia and CC Pines to design and manufacture air conditioning, ventilation and electrical for the Australian Embassy building to be built in Australia and shipped to Rabat Morocco.

Coming up with a solution to meet Moroccan Standards that could be built in a modular format was not only challenging but very rewarding, delivering a building that was successful upon commissioning in Australia before its separation ready for delivery to Morocco.


The building featured DFAT security and acoustic requirements for all rooms and proved a difficult challenge for our ducted air conditioning and electrical installation.
